EXPERIENCE

Paul Lanteri is experienced in all phases of the architectural investigation, design, document production, and construction administration processes. His expertise includes the investigation and resolution of water infiltration problems, construction failures, and other deterioration conditions in various commercial, public, institutional, and historic structures.

Mr. Lanteri has led investigation/design project teams in evaluating and establishing building system conditions and functional requirements, and in developing alternate design solutions to address determined rehabilitation needs. His additional projects involve survey investigations, contract document production, and construction administration processes.

REPRESENTATIVE PROJECTS
